

IAgrE Western Branch Lecture

Extreme Engineering

The IAgrE Western Branch is pleased to host a lecture by
Mr Andy Spearey

Andy Spearey has kindly agreed to deliver a lecture detailing some of his experiences of working with the Antarctic Survey at Halley Research Station. The Station is an internationally important platform for global earth, atmospheric and space weather observation in a climate sensitive zone. Built on a floating ice shelf in the Weddell Sea, Halley VI is the world's first re-locatable research facility. Getting an engine to start at -45°C requires engineering skills with added ingenuity and perseverance.

Date: Wednesday, 22 November 2017
Time: 7.30 pm for the lecture
6.00 pm if you wish to order food (not included)
Venue: The Greyhound, Bromham,
Chippenham, Wiltshire, SN15 2HA.

To register for this event please contact Branch Secretary:
Mike Whiting 07751 315580 or mike.whiting@newmac.org.uk

Event hosted by the Institution of Agricultural Engineers
