

IAgrE Mzuri Visit

Join us at Mzuri's innovative and forward-thinking trial farm

Springfield Farm, Worcestershire

The Mzuri strip tillage system is the result of years of trial work and development into reduced tillage practices for improving soil structure, increasing yields and overall arable farming profitability.

The visit to the Mzuri operations provides us with the opportunity to experience the engineering concepts applied for developing innovative strip tillage systems. In addition there is also the opportunity to visit the business's trial farm and see how the Mzuri system delivers in practice.

Wednesday 21st November

A buffet lunch will be available at the Mzuri site from 12.30pm onwards with the event to commence from 1.00pm. Expected to finish around 3.30pm.

Please bring appropriate footwear and clothing for the farm visit.

Confirmation of attendance is required by 26.10.18, as numbers are restricted .

Please confirm attendance via

Mike Whiting; mike.whiting@newmac.org.uk ; 07751 315580
