European
Patent Office

Office européen
des brevets

The European Patent Office is currently recruiting

Engineers and Scientists

to work as patent examiners at its offices in Munich, Berlin (DE) and The Hague (NL).

Your profile:

- national of an EPO member state
- full university degree
- good working knowledge of at least two of the EPO official languages (English, French and German) and willingness to learn the third before starting work as an examiner

Our offer:

- long-term employment in an international environment at the forefront of Technology
- intensive initial training in all aspects of patent examination, follow-up courses
- attractive salary, social security package and working conditions generally

Your job will be to examine patent applications in the three official languages and take decisions on the granting of patents valid in up to 36 European countries.

For more details on this position and many other vacancies to work as a Patent Examiner in our offices in Munich (DE), Berlin (DE) and The Hague (NL), as well as details on how to apply, visit our employment pages at

<http://www.epo.org/about-us/jobs/engineers-scientists.html>

Note : If you apply to one of these positions, please mention the Reference Target 1 at page 1 (section : how did you hear about this vacancy?) in the EPO online application form

The European Patent Office – the patent granting authority in Europe – is a self-financing intergovernmental organisation with over 6000 staff at four different locations. It currently has 32 member states and operates the fastest-growing regional patent system worldwide. Working for the EPO means supporting innovation, competitiveness and economic growth for the benefit of European citizens.
