

Job Brief

A vacancy has arisen for a Technician, to join the prototype workshop team, within Landpower Product Engineering based in Cheadle.

Reporting to the Workshop Manager, you will join a highly focused team, working on two of JCB Agriculture's most revered products, the Fastrac and the Telemaster

Role Title: Prototype Workshop Technician

Business Unit: JCB Landpower

Location: JCB Landpower, Leek Road, Cheadle, Staffordshire, ST10 2JU

Reference Number:

Role duties and responsibilities:

On a day to day basis you will be:-

Supporting Design and Development on current and future projects
Building prototypes and test rigs
Strip down of machines, components and rigs, inspection and rebuild
Machine fault finding and repair
Modification of wiring looms and circuits
Support prototype machines in the field.
General servicing and maintenance.

About you:

We would expect you to have experience within a similar role and possess relevant technical qualifications or have equivalent experience.

Welding and fabrication knowledge is essential
Understanding of electrical/ electronic systems advantageous.
Reading and understanding engineering drawings is essential

You should also be able to demonstrate enthusiasm and the ability to work on your own initiative, as well as part of a team.

A thorough product knowledge of agricultural tractors, equipment and their applications would be desirable.
