

CHAP

CROP HEALTH & PROTECTION

Linsey Cresswell-Commercial Director.

We work with **INNOVATE UK**

Four Centre's: One Vision

The Centres are essential catalysts for change. They provide a gateway for business to access the best scientific expertise - stimulating new research, practice and technology for the agrifood sector. Each Centre has its own unique focus; building capabilities that can lead the world in delivering sustainable food and farming solutions.

CHAP Capabilities

E-Flows Mesocosm

- Optimising and standardising higher tier risk assessments.
- Providing the industry with high quality regulatory evidence so that new plant protection products are granted regulatory approval.
- Supporting the development of new crop protection products which are safe for our aquatic environment.
