Optimising Direct Drilling Methods in No Tillage Farming Systems

Speakers – Iain Dummett & Michail Giannitsopoulos, Cranfield University

Venue – Friends Meeting House, 37 Maidenhead Road,
Stratford upon Avon, CV37 6XT

Non-inversion and one pass tillage systems are receiving an increased interest in the UK. Iain and Michail's presentation will highlight some of their research findings regarding crop performance and soil health for autumn sown wheat and oilseed rape crops planted using a range of strip tillage systems. Establishment, yield and soil analysis results, alongside some controlled condition experiments will give a better picture of the performance of these systems.

Guests and visitors welcome to the meeting. Light refreshments will be served.
