

The Institution of Agricultural Engineers

Founded 1938 – Incorporated 1960

IAgrE Branch Meritorious Award

Mike Whiting

MIAgrE

Whilst it is traditional to award Branch Meritorious Awards to senior members, it has become a Western Branch tradition to simply acknowledge those who are making a continuous and relevant contribution to the success of our programme.

As we all know, our Institution can only engage with its members when it provides relevant and interesting information, we believe that the Western Branch is fortunate to have Mike ensuring that the standard is maintained.

Mike is also a champion of CPD and we need our younger members to build records, not only for their progression in their career, but to help our Institution maintain its academic standing.

Mike keeps the committee on its toes as well as ensuring that contact is maintained with other branch members.

I have the full support of Rupert Caplat and Nick Handy in proposing that Mike receive this award in recognition of his sustained contribution in preserving the future of our Institution at both Branch and National level.
