

The Institution of Agricultural Engineers

Founded 1938 – Incorporated 1960

IAgrE Meritorious Award 2026

Mike Whiting

CEng MIAgrE

A staunch secretary of the Western Branch

The creation of a general Meritorious Award gives the Western Branch the opportunity to acknowledge the work Mike puts in, not only to Branch activity, but also to the Institution and our industry in general.

Our Branch must be one of the most consistently active with particular effort expended involving both Lackham College and the RAU at Cirencester.

Organising both suitable speakers and the logistics of the events takes a persistence and attention to detail which are his trademark.

Mike also contributes to our Council and works in the real world both at home and overseas interpreting the most obscure of legislation. This work is fully appreciated by industry professionals who fully endorse this citation.
