

## **Agricultural Recruitment Specialists**

**Built on Integrity. Trusted by the Industry. Proven to Deliver.**

Agricultural Recruitment Specialists is a family-run recruitment business dedicated exclusively to the agricultural, land-based and environmental engineering sectors.

Since 2012, we have partnered with forward-thinking employers and ambitious professionals across agriculture, horticulture, food production, machinery manufacturing and agri-tech — helping build the teams and careers that drive the industry forward.

We are not generalist recruiters.

We live and breathe this sector.

From agricultural machinery design and engineering to precision farming, crop and livestock systems, agri-technology and sustainable land use, we understand the technical expertise and commercial realities that shape this industry. That knowledge allows us to deliver recruitment solutions that are precise, consultative and built for long-term success.

Our approach is straightforward and relationship-led. We operate with honesty, openness and clear communication — values that have earned us lasting partnerships across the sector.

The results speak for themselves:

- 85%+ of our business is repeat business
- 90% fill rate (well above industry averages)
- 100% success rate on dedicated headhunting assignments since inception
- Many candidates go on to become clients

We cover permanent and executive appointments, supporting both immediate hiring needs and long-term strategic growth.

But what truly sets us apart is simple:

We care about the people and the future of the industry.

Whether you are looking to strengthen your team or take the next step in your career, Agricultural Recruitment Specialists provides the expertise, network and integrity to deliver.
