## Role Purpose

Natural Resources Wales is looking to recruit a number of civil engineers across Wales to help us manage almost 4,000km of forest roads with associated infrastructure. As an engineer in Natural Resources Wales you'll be involved in projects that improve the environment, enhance recreation for the local community and grow the Welsh economy. We're looking for Technicians and Incorporated Engineers (or equivalent experience) who want to work on the top of a hill in the middle of the forest where only Wales' most beautiful flora and fauna exists. Please visit our jobs page for more details.

## Qualifications and Skills

1. Educated to a minimum of degree level in an engineering or related technical subject, or equivalent demonstratable experience. **(essential)**
2. Post holders should have significant experience of programme & or multi-project management and have or be working towards professional accreditation (E.g. Prince 2) **(desirable)**
3. Awareness of Environmental habitats and wildlife, and legislation which informs decision making in relevant **(desirable)**
4. Extensive knowledge, understanding and application of CDM2015 and other Health, Safety & Environmental risk management **(essential)**
5. Extensive knowledge of drainage and water management in upland environments, complying with Forest and Water Guidelines and the European Water Framework Directive. **(essential)**
6. Experience of working with water-bound macadam road construction, ground & earthworks engineering in an upland/rural environment **(essential)**
7. Surveying and Setting out road alignments **(essential)**
8. Strong ICT skills in AutoCAD, ArcGIS and Microsoft Office software, including MS Project **(essential)**
9. UK full driving licence **(essential)**
